

Jeffco Action Center, Inc.

Providing an Immediate Response to Basic Human Needs and Promoting Pathways to Self-sufficiency in Jefferson County Since 1968

July 2010

To Whom It May Concern:

Marcia and James have provided valuable professional support to Jeffco Action Center's Board, Senior Team and our full staff for many years. Their facilitation, team building and executive development coaching have made an indelible difference in how well we operate to meet the growing needs of our clients, the homeless and nearly homeless in Jefferson County.

In particular, the assessments we have worked with add clarity and focus to our capacity. The TESI has helped our teams take a look at how they are performing today and strategically improve their future engagement. The EQi and Emergenetics have helped our staff better understand their personality preferences and skills so they could work better as a team an individually, be happier and serve our mission at their best ability.

I whole heartily recommend working with Collaborative Growth in order to boost your team, board and executive performance and well-being.

Sincerely,

Mag Strittmatter
Executive Director
